## M. Doig And Schafhausen Present Campaign Planks

Two Candidates For Presidency of McGill Debating Union Society Present Ideas to Student Body — Both Law Students — Have Been Active in Campus Activity For Several Years — Elections on Friday, March 8th

Following the announced policy, the 'Daily' today presents the first of the platforms of candidates seeking office in the forthcoming elections. The following platforms have been submitted by the candidates for the Presidency of the McGill Debating Union Society. In the Editorial Columns will be found an outline of the purposes of this Society. The following are the Platforms accompanied by short biographies of the activities of the two students:

Melbourne A. Doig, Law 2.

Henry M. Schafhausen, Law 1.

MELBOURNE A. DOIG was for two years Junior Treasurer of McGill Debating Union. He has debated against Oxford, Cambridge, University of Vermont, Toronto, Harvard and University of Montreal. He is a member of the Scarlet Key Society. While in the Faculty of Arts he was a member of the Class of Arts '32 Executive. He was active on the Water Polo Team of the University and took part in several plays of the English Department.

### Doig's Platform

I should like, on my own behalf, as one of the two candidates for the Presidency of the Debating Union, to congratulate you on your policy of requesting the election contestants to publish in the Daily the aims and views for their conduct in office.

The basis of my ambitions for the Debating Union has always been the desire to increase the interest it inherently, but sometimes insignificantly, possesses for the student. This will automatically have the effect of increasing the quantity and the quality of student participation.

How to do this? In meetings of the Debating Union Executive, I have often advanced one solution that I still believe in—centralization of debating activities.

As the first step, I would urge that the women students be asked to accept membership in the Debating Union. But, I do this for two reasons:

First, because our denial to women students of membership in the principal debates of this, a modern liberal university is an educational paradox, an anachronism that should have been corrected long ago.

Secondly, centralization. I believe that this diversion in our ranks of the talent and "interest potentiality" of the women students will be an important step towards realization of a greater role for debating at McGill.

As the second step, but only if quite necessary, I am in favour of dissolution of the Junior Debating organization. I am well aware of the good work that this junior body has done in the past, and of the splendid record it has earned in the city debating circles. But I have also noticed that its members are not particularly active body's meetings.

When, and if, debating becomes so

## Grads' Song Features Annual Smoker Sat.

### Prime Minister's Speech Will be Responded to by

E. W. Beatty

Prime Minister Bennett will address the assembled graduates at the Annual Smoker to be held on Saturday, March 8th, after an introduction by John T. Hackett, K.C., President of the Graduates' Society. Thanks will be extended to the Prime Minister by E. W. Beatty, K.C., Chancellor of the University.

Although Dr. Chipman and Dr. Stephen Leacock will be unable to attend, the items previously announced have been retained. Professor Nobbs and Mr. Consiglio, the Gymnasts and Mr. Aspler, (B.A. '29), in charge of the orchestra, have arranged to carry out their part of the program.

A new "Grads' Song" has been written for the occasion. The words of the song, which will be sung in the evening under the direction of Dr. A. S. Lamb, will be published in the Graduates' Section. Lorne Gales will present a brief review of the undergraduate activities.

Three pairs of Season Football tickets will be drawn for which purpose tickets will be numbered. After the drawing refreshments will be served. Dr. D. Slater Lewis, President of the Montreal Branch of the Graduates' Society will be chairman of the Smoker.

## Political Situation In Britain Brought To Light In Talk

Says England is Returning to Pre-war Policy

### DISCUSSES POLICY

Says Britain is Again Leading In Foreign Affairs

A ROW OF exhausted volcanoes was the analogy drawn by King Gordon as he outlined the condition of England's National Government, at one of his regular noon-day addresses, in Strathcona Hall, yesterday. He then went on to discuss recent political changes and their causes. Up to a few months ago, the government situation was firm, the speaker pointed out, and the tendency was toward prosperity and a decrease in unemployment. Employers were encouraged to increase their personnel, and the psychological effect of a sound National Government was generally felt. Moreover, protective tariffs quickened internal recovery.

The speaker then changed his point, as he brought to light the deplorable conditions which have lately arisen from recent changes in the labour policy. He stated that under these same tariffs the export trade is still falling off and that the domestic outlook is not as bright as formerly. The rate of recovery is beginning to decline. Unemployment figures have risen during the last few months, and there is a lack of confidence in the Government. The Government took over the relief system for the sake of economy and in doing so laid itself open to the criticism of those dissatisfied with the system. The Government adopted a plan of the same basis of relief in every municipality, giving no thought to differing conditions. There is general resentment against the Government, and there is much disturbance in the House of Commons. The Government, its prestige shaken, was forced to increase the amount of relief.

### Indian Policy

Turning to Britain's policy in India, King Gordon stated that the report on Indian Federation is by no means thought satisfactory by the inhabitants of this possession. The Indian princes raise the objection that guarantees previously made have not been fulfilled. He also pointed out that the Liberals want self-government for India.

Speaking of England's foreign policy, the speaker asserted that the government, up to a short time ago, followed a vacillating policy, and public confidence was shaken.

(Continued on page three)

## Artsmen Urged To Buy Arts Magazine

"An Arts Magazine for Artsmen" is the motto of the powers behind the production of their publication. The Arts Magazine, which will be issued early in March, will contain seventy pages of reading matter, including humorous articles, poems, items of general interest and all will be featured. This number will be more voluminous than last year's and those publishing it advise Artsmen to buy their copies early for the number is limited to five hundred. The price will be twenty-five cents per copy.

## Junior Debaters Flaunt Fury Of R.V.C. Amazons

CAT-FIGHTING, hair-pulling, and face-scratching will be the major feature next Tuesday night, when the fair co-eds of R.V.C. '37 and '38, meet at another "election campaign" at the Union Ballroom, scene of many a victory over the members of the opposite sex, and possibly members of the opposition.

The major issue that will be fought over will be whether co-ed graduates (and women in general) should become members of parliament and run the country, or whether they should stay home and run their husbands. And so we await with bated breath for the day (Tuesday), for the hour (8 o'clock), for the minute (53 past the hour) when Eileen Crutchfield, leader of the opposition, gets up in a "Central Hall" and denounces the policy of Allan Anderson and his grafting politicians, namely Edmund Gordon, Ivor Williams, Charles Lapinsky and Sidney Freedman.

An Engineer, alias a Plumber, alias the Shadow, alias the Red Wolf, (don't forget to drink your Ovaltody, Adv.), will sit in the government bench.

Margaret Clare, Geraldine Breitckze and many (3) other fair spitfires will create havoc with the government party by screaming "You Vipers!" and telling them that they're a little "Tatched in the head" Whereas six other R.V.C. Venuses who will occupy twelve seats in the government benches (traitors) and say "nuts to you!"

Thus this pre-election campaign between Conservatives, Liberals and Independents and what have you will have all the earmarks of a battle between the ancient (not in this case) Amazons. The Junior Debating League telegraphs us that if anyone desires to flaunt the fury of the R.V.C.-ites, by sitting in the benches of any of the parties, let him if he dares code. The R. Hon. Allan Anderson, K.C.

## Plumbers Promise Surprise Features On Dance Program

A SOUVENIR program of a new type will be a feature of the Plumbers' Ball which takes place in the Mount Royal Hotel next Tuesday, March 5th. While the program retains its traditional form of a folded blueprint, features have been added which are absolutely new to the Plumbers' Ball and which the committee believes are unique.

The exact nature of the program was not announced, the spokesman for the committee stating that it was to remain a surprise item. He also mentioned that several other "surprises" would greet the Plumbers' guests on the big night. Among these was the possibility of a skit, played by members of Howard Simpson's Privateers who are providing the melodies.

Sale of tickets is well ahead of that of other years, according to Harry Grimsdale, chief salesman. There are still a number remaining, however. The entire issue will be offered to undergraduates in faculties other than engineering tomorrow. So far, only a limited number have been set aside for these.

Tickets at \$5.00 are now on sale from Harry Grimsdale, Bert Yates and Bill Gentleman.

## Anti-War League Plans Symposium For Next Monday

MacLennan, Ritchie, and Wallace to Speak

McGILL'S League Against War and the Suppression of Civil Liberties will hold its next meeting on Monday afternoon, March 3rd, at four o'clock in Strathcona Hall. The subject will be a symposium on "Different Views of War."

The speakers will be Dean Ritchie, of the United Theological College; Dr. R. D. MacLennan, Professor of Philosophy at McGill; and Joseph Wallace, graduate of Franconis Xavier College, who is a labour leader in Montreal.

Dean Ritchie served at a chaplain at the front during the Great War, and thus is qualified to speak on this subject. He will present the Christian attitude on war and its abolition.

Professor MacLennan will give a description of the philosophical view on this subject, and will discuss the fundamental causes of war. Wallace will present the views of a student leader.

The executive of the Anti-War League states that it is anxious to have the military point of view presented, and that anyone who wishes to give these views is invited to do so.

## Labour Club Meets

Mendel B. Laxer to Address Members This Afternoon

At 4.30 this afternoon in the Music Room of the McGill Union, Mendel Laxer will address the members of the Labour Club, speaking on "The Battle on the European Campus." The Labour Club has recently become affiliated with the Student League of Canada, and has been co-operating with the student socialist movement here in Montreal.

Chosen delegates to represent the McGill Anti-War League in the European Congress, held during the Christmas holidays, Laxer has made himself acquainted with the situation overseas. He has also been a student of college socialist activities both in Europe and in Canada.

## Physical Society

Tomorrow at five o'clock Prof. E. F. Burton will address the Physical Society on "Research in Physics at Toronto." Dr. Burton, a graduate of the Universities of Toronto and Cambridge, has for many years been a professor in the Department of Physics in the former University. In 1932 he succeeded Prof. J. C. McLennan as full Professor, Head of the Department, and Director of the McLennan Laboratory.

Professor Burton is a Fellow of the Royal Society of Canada, and has done extensive research work on the physical properties of colloids.

The meeting, held in the Physics Building, will be open to anyone who is interested.

## Affirmative Scores In U. of T. Mock Parliament Session

Vineberg and Smith Defeat Motion Upheld by Pick and Mayall

### VOTE OVERWHELMING

Lack of Confidence in Government Proven by Victor

BY R. G. ANGLIN

TORONTO, Feb. 27. — Leading a triumphant attack upon the motion, resolved "that this house has confidence in His Majesty's Government at Ottawa," Mr. Philip Vineberg of McGill University, assisted by Mr. Arnold Smith of Toronto were successful in the final Hart House debate of the season, held here tonight. The motion was defeated by a vote of eighty-four to fifty-two in spite of the capable defense offered by Mr. K. M. Mayall, Toronto and Mr. A. Pick of Montreal.

Launching his attack on present administration in style of delivery that commanded respect of usually boisterous Hart House parliament Mr. Vineberg quoted Mr. Bennett's pre-election speech of 1930. "Mr. King has promised to consider the situation," the present Premier had said at the time—"I promise to end unemployment" in five years that have since elapsed. Conservatives have done nothing, charged Honorable Member from McGill.

"We have thus become so used to having Government do nothing that when Prime Minister offers one little item of reform we hail him as great statesman." Supporting the motion and His Majesty's Government at Ottawa the second speaker from McGill offered his defense in lighter vein depicting lack of feminine inspiration at Toronto debates. Praising Prime Minister's description of Mr. King as a "master of inactivity" he denounced the Liberals for policy of promise without action. The C.C.F. on other hand offer only fantastic theories while Conservative party alone are prepared to launch practical reforms.

## Sophomore Dance Planned At R.V.C.

### Decorations Will Impart Mardi-Gras Spirit

It has been announced by the committee that the dance for Arts, Commerce and R.V.C. sophomores will be held in the R.V.C. dining room, on Tuesday, March 5, Mrs. Vaughn has kindly consented to be patron. The decorations in the hall are to be in tune with the Mardi-Gras celebrations elsewhere.

Gordie Wall, and his eight piece orchestra will supply the music for the dancing, which will commence at 9 o'clock and will continue till the early hours of the next morning.

Tickets may be obtained from Bill Gentleman in the Arts Building and from Jack Iredale. They are priced at \$1.25 per couple including supper.

Plans have been made to make this dance one to be remembered and the committee feels sure all who attend have a really pleasant evening.

## Veteran Recalls College Spirit Of Former Years

LET us reflect back ten years—those of us who can, and recall that momentous day. The Month was March but you old timers probably remember it as the month the annual was issued. For way back then days this was the event by which time was marked. And now our tale unfolds, and it is one that we are proud to recite—the cocks of our hearts' war.

There stood the Union, then as now, the heart of the student body, from which emanated this great thing called McGill Spirit. Its proud facade weathering wintry blasts, as it benevolently watched throngs of students, with impatient countenances, pressing, forcing, urging ever forward to and through its mighty portals.

Who is it of whom we speak? Who were those exhibiting this grandiose display of spirit and to what purpose? And another question: Why this unrelenting struggle to get within the Union? Attend these answers. These men were the Freshmen of '26—and when we say men—we mean men; men of undaunted spirit, the men that make a college. What great motive propelled this forceful drive? Enough of questions. They sought the McGill Annual, here it was to be had.

### Epilogue

All gained entry to the Union and all their Annuals—all but one and we must tell of him. His fate was sad yet noble. When all confusion had subsided he was found crushed and dead beneath the snow, his quest for an Annual in vain, a martyr to the cause. You Freshmen '38 be also of such spirit.

### Moral

Get Your Annuals Early So As Not To Be Late To Dead

## Drop Close Game To Ottawa By 2-1 Margin

Cholette and Pratt Tally For Barber-Poles — Duff Scores McGill's Counter on Pass From Morse — McHugh and Meiklejohn Outstanding For Redmen — Pidcock Shows up Well — McLernon Plays Last Game

By Hy Perelmutter

STAN PRATT, burly Ottawa defenceman, wrote finis to McGill's playoff aspirations as he careened down the ice to score on a beautiful solo effort, with only four minutes to go. The Redmen swarmed round Peterkin for the remaining moments

## JOTTINGS

By X. B. X.

YOUR ever-faithful correspondent, unwilling to accept any statistician's round figures, counted the crowd last night and made it exactly 9,999. At that a good many of the rush-end seats were empty, a number of fans apparently preferring to stand in the more aristocratic sections rather than sit with the hot polloi. Such snobishness.

Our worthy colleague, whose graphic description (at least it's supposed to be graphic) of the game appears on an adjoining column was afflicted early in the evening, with a stiff neck which he trusted to the exercise involved in following the play to remove. Unfortunately, he chose a corner box where the neck-craneing was reduced to a minimum and emerged still stiff. How sad. We suggest a visit to the Pollice.

CONSIDERING the world shaking issues at stake, the fact that only two penalties were issued by the presiding hawkshaws speaks for something or other. Mr. Wigle escaped scot-free, for a change, despite some heavy checking. Meiklejohn was also handing out a few stonewalls, more in his early season style. Lamb drew the only Red penalty for an apparently unintentional trip.

All of which doesn't mean that there wasn't any rough stuff. Ask Messrs. Olsen and Peterkin, both of whom were forced to retire for repairs after suffering at the hands of the McGill gladiators. Gordie Crutchfield also took a brief rest after stopping a puck with his left ear.

WE had it all figured out beforehand to tell you that it was Maynly Peterkin who was responsible for the

(Continued on page 3)

## Junior Engineering Section Convenes

The Junior Section of the Engineering Institute of Canada have called a meeting to take place today at the Institute at 8.15 p.m. tonight. The paper tonight will be delivered by Horace Young, a fourth year student in Mining. He has been asked to speak on "Mineral Production in Canada and Its Effect in Industry." The second speaker will be Mr. Yvon Tasse who will speak on "Le Vent Pour l'Electricite nos Campagnes." Mr. Tasse is in his final year at the Ecole Polytechnique.

### Sensational Netminding

For McGill every man played for all he was worth, but victory evidently wasn't in the books for them. McHugh was a standout in the nets. Time and again he pulled off sensational saves that literally added years to yours truly's growth. The goals that got by him were not very stoppable. Gordie Meiklejohn was a lower of strength on the defence. Both he and Fred Wigle, and Cliff McKay gave the Ottawa attackers many a rude jolt.

Tommy Morse turned in a fine game on the forward line, garnering an assist and missing several goals by mere flukes. Alec Duff's tally was a beauty, while Gordie Crutchfield and McLernon were always dangerous. Things began to happen when Rolfe Lamb was penalized. Tommy Morse and Paul Pidcock carried the play

(Continued on page three)

## Biological Society Hears Dr. Seecof

### To Speak on Mitochondria Structure Tuesday

An address of particular interest to medical students and those interested in cytology will be given before the Biological Society by Dr. D. P. Seecof next Tuesday evening. Dr. Seecof will speak on "The structure of the Mitochondria and their Relation to the Function of the Thyroid." This meeting will start at 8.15 o'clock in the Biological Building.

Dr. Seecof has carried on extensive work on the thyroid gland, and is the discoverer of the so called "Seecof cells." His researches indicate that there are variations in the structure of the mitochondria of these cells in various experimental and clinical conditions. He will attempt to trace these changes through, and arrive at an interpretation of their significance.

**Registrar.**

# Cunningham To Race In Track Meet

American Star Signifies Intention to Enter Indoor Event

EDWARDS IN RELAY

Outstanding Red Runner Will Confine Himself to One Event

FRIDAY, March 8th, will see the running-off of the Province of Quebec Track and Field meet. Coach Van Wagner will have his champion Intercollegiate track team competing on that night against the cream of the International stars. The McGill men have been training rigorously priming themselves for this meet and they will have to be at their very best when competing against such famous speed demons as: Glen Cunningham, Glen Dawson, Chuck Hornbostel, John Grady and others.

Phil Edwards, Jim Worrall, Gene Record, Bill Amaron, Frank Nobbs, Terry Todd, Ray Stote, Charlie Thompson, I. T. Smith, and Bill Pounder have been nominated by Coach Wagner to uphold the prestige of McGill in this meet. Likewise competing in this championship will be Intercollegiate luminaries from the University of Vermont and Middlebury College, thus including other college athletes from the United States, the collegiate color and glamor will permeate the various events.

Edwards in Relay

It was announced last night that Phil Edwards, brilliant Empire Games star and with few peers in his specialty runs, will only take part in the relay races in which he will act as anchor man for the McGill quartet of Nobbs-Amaron-Worrall-Edwards. Thus those who had looked forward to a thrilling duel between Glen Cunningham expert exponent of the art of running and the Montreal whippet are doomed to disappointment. In the 1932 Los Angeles Olympic Games, Phil led the now famous Glen Cunningham to the top when he placed third, while the University of Kansas speedster had to content himself with a fourth place. It had been hoped that these two would meet in the mile, but present indications are against this.

Chuck Hornbostel, presently attending the University of Indiana, came third in the half-mile at Los Angeles in 1932 and only recently lost to Dawson in the New York meet Saturday last. A thrilling return match is expected between these two international stars, should an injured leg muscle injured by the Indiana flash in the New York race heal. However they will receive plenty of competition from their Canadian cousins and it would not be surprising at all to see a few records go by the boards.

McGill Entrants

Jim Worrall and Red Record, former 1931-32 American Intercollegiate champion, will be the main threats in the hurdle races and McGill should score in this race as well as in a relay or two. Ray Stote will be the McGill representative in the two mile torture run and on present form should place well up.

The main attraction of the meet, of course, will be Glen Cunningham who, with the possible exception of Lovelock of England, is the outstanding miler in the world today. Attending the University of Kansas, this winged wonder of the spikes only recently set a world's record for the mile run and if he chooses to open up at the Forum and is given the slightest opposition should establish a new Canadian record. Dr. A. S. Lamb, President of the Association, will announce the complete lists for the meet within the next few days and to date entries are pouring in from New York, New Jersey, Toronto, Hamilton, Ottawa, Buffalo and other far flung cities.

## Intermediate Basketball

The McGill Intermediate team will meet at the Montreal High School at 5 p.m. tomorrow to go out to Loyola for a game scheduled there.

## Correspondence

(Continued from page two)

ation. So you see that there can be no question of only one phylactery being used at a time. Indeed, a special occasion is made of the time a boy first learns to use the phylacteries, the morning after his confirmation (bar-mitzvah) at the age of thirteen. He must not mistake between the shel-yosh (head-phylactery) and the shel-yad (arm-phylactery), and he must learn to don each at its appropriate moment and with its appropriate prayers.

I am sure that the error in question sneaked in through some oversight and will be corrected so as to eliminate the false impression which it creates.

Yours truly  
HEBREW

# AS SEEN BY A SPORTS' OBSERVER

By A. D. S.

DISPLAYING a brand of hockey that would ordinarily have spelled victory, the McGill sextette succumbed to an improved Ottawa squad at the Forum last night. This loss means elimination for the Red Team in the Senior Group and the Allan Cup title hunt. The Capital City team will now meet Royals in a 2 out of 3 game series the outcome of which will determine the Senior Group representative in the Allan Cup Playoff.

THEIR loss, however, does not reflect discredit on this year's edition of the Red Team. In retrospect the fact that the Red sextette reached the sensational heights that they did is a matter that gives rise to a justifiable pride in the Martlets Pre-season predictions placed McGill in the cellar position but they proved the dark horse in the Senior League by rising to the sensational heights that they did. In losing McGill went down only after an exhibition of courage which has particularly characterized this year's Red Team. Throughout the season they displayed a brand of hockey which brought them within striking distance of the starchy Red Raiders of last season. We doff our hat to Coach Bell and his new Red Raiders.

A MAN whose name is synonymous with speed, Glenn Cunningham has announced his intention of competing in the forthcoming Dominion Indoor Track Meet sponsored by the Province of Quebec Track and Field Association. At present attending the University of Kansas, Cunningham's chief claim to athletic fame lies in his recognition as the outstanding mile runner on the North American Continent. His entry should do much to provide the evening of March 8th with attraction galore.

McGILL has its share of entrants in this event with, Edwards Worrall and Record as their outstanding contribution. Cunningham will undoubtedly compete in his specialty the one mile run, while Glen Dawson of Oklahoma is at present the outstanding choice for the 1000 yard event. Another runner from below the border who might possibly partake in this latter run is Charlie Hornbostel of the University of Indiana who represented the United States in the 1932 Olympic placing in the half mile final.

REPRESENTING Canada in the 1932 Olympics Phil Edwards placed third in the final of the one mile run bringing prestige to the Dominion by being the first North American to place in that event. He ran third to Cornes of England and Pecalli of Italy. Of more immediate significance, however, is the fact that the genial Phil outran Cunningham, who placed fourth. Another meeting between these two outstanding runners in the Montreal meet scheduled for Friday, March 8th, however, does not appear within the realm of possibility. It was indicated last evening by Edwards that he would compete solely in the relays being the anchor man for the Red quartette in that event.

THE biggest sports news in many a year leaped into print yesterday with accounts of New York's release of George Herman "Babe" Ruth to the Boston Braves of the National League. Thus the mighty King of Swat severs his fifteen years of allegiance with the American League and returns to the city which saw him get his first start in the big time as a pitcher of rare ability. He stood head and shoulders over all the immortal baseball figures as the greatest drawing card that sportedom has ever known and his prodigious feats are still fresh and far too numerous to numerate here. His very name is perhaps known to more

people—young and old—than any living personage.

JAPAN took the colorful Babe to heart and hundreds of thousands swarmed about the hero on his recent tour there. In joining Boston, the rotund and rubber-legged veteran—who uplifted the game from the depths of scandal and corruption—augurs well to swell the coffers of the financially embarrassed Braves, but we'll wager the turnstiles at the Yankee Stadium will use far less oil this year! True, Lou Gehrig will still be up there taking his cut at the spheroid for Col. Jake Ruppert, but he is neither the showman nor the drawing magnet the mighty babe is and that's what draws the fans.

STATISTICIANS state that the expected thrill of viewing a Ruthian wallop draws forty per cent of the home crowd and over fifty per cent while on the road. To date Babe has earned over a million and a quarter dollars on his home run prowess. The Great Man is past his prime but he still has his uncanny eye-sight and power-house swing even though the veteran forty-one year old legs are pathetically wobbly. His entrance into the National League will be a severe headache to the Dean brothers, Hubbell and other starchy flingers.

## B. W. & F. NOTICE

The date for the B. W. & F. picture is today at 5 p.m., at Rice's Studios. All Boxing and Wrestling men should bring their own equipment.

# Drop Close Game To Ottawa By 2-1 Margin

(Continued from page one)

to the Senators and brought the house down with their stickhandling. Jack Wilkinson, the hefty Ottawa defenseman, then got himself chased, and Pidcock missed a tally by a mere eyelash.

With but three minutes to go in the second period, Alec Duff took the puck up the ice, passed to Tommy Morse, who whipped the puck back to him for the equalizer. Duff's shot was a sizzler, and Peterkin, who had been playing a whale of a game in the nets, went down like a log. He was carried off, and the game was held up for ten minutes.

The game was resumed with McGill attacking strongly, and Bob McLernon just missed an open net. Gordie Meiklejohn and Cliff McKay then tried individual sorties which made Pidcock jump plenty.

## Redmen Miss Chances

With the beginning of the third period, McGill tore into the attack and got through time and time again only to miss the mark by inches. Jean-Paul Elle missed two in a row; then Lamb and Morse got in close, only to be foiled by Peterkin or the Fates. Take your pick. Then came Pratt's goal, and the Redmen's last-minute stand, and the final bell.

Paul Pidcock showed that he belongs in Senior company, with a display that had all the fans pulling for him. Rolfe Lamb skated hard and displayed some of his old-time speed, although evidently hampered by that touch of la grippe. And thus ended another highly successful hockey season which started off slowly, with experts not even conceding the Bellmen

# Murray Advances To Quarter-Finals In Bermuda Play

Upsets McDiarmid, Seeded Fourth, in Straight Sets

IN AS STARTLING an upset as has been recorded in championship tennis play in some time, Bob Murray of McGill yesterday disposed of the Texas schoolteacher, John McDiarmid, 6-1, 6-4, in the 14th annual Bermuda tennis championship play being presently held at Hamilton, Bermuda. By this victory, Murray enters the quarter-final round.

McDiarmid was seeded fourth in this tournament in which are partaking such well known tennis stars from across the border as Berkeley Bell of New York, Gilbert Hall of South Orange, N.J., Bryan Grant of Atlanta, Robert Bryan of Chattanooga, Tenn., and Dr. Eugene McCauliff, former Fordham star, of Yonkers, N.Y.

Murray presently holds the Intercollegiate singles tennis title, as well as holding the Province of Quebec title, and the Canadian indoor singles championship.

## Track

Trackmen may get equipment in the Montreal High Gym tomorrow at 5 p.m.

# JOTTINGS

(Continued from page one)

Barber-Poles victory but on second thoughts we'll scrap the pun (Yeah) and hand the laurels to the Senators' defence, in particular Messrs. Pratt and Wilkinson. Time and again the best efforts of the Red forwards came to naught against the bulwark which these two hefty presented and when they weren't actually spilling the boys they managed to muck the plays up pretty thoroughly.

Endeavouring to spot Mr. Olsen before the game, our aforementioned colleague kept a weather-eye open for a blond head and soon spotted the tricky forward. Pratt and Wilkinson also boast flaxen tresses. A fair coed was heard to remark before the last period that these two would go down well at the Plumbers' Ball. Do ladies, beg pardon, we mean coeds, prefer blonds or was the damsel thinking of the boy's physique? They'd qualify on either score.

CHOLETTE's shot for the first goal kept the crowd supplied with conversational material for the rest of the game. It was a typical Cholette effort from just the right side of the blue line. The marksman's return to the right wing was apparently just what the doctor ordered. He didn't show up particularly well in his last two performances at pivot.

Bobby Bell came out on the ice after the game to shake hands with Wilkinson. This big lad's pleasant and cheery attitude has been a bright light of the series. The handshaking was general and there were apparently no hard feelings.

McLERNON, playing his last game for McGill took a hard ride from the Senators' defence but wasn't slowed for a minute. Crosby was pounding right along but couldn't seem to get his shot in working order. Gordie Crutchfield played his usual steady, heady game.

Bobby Bell had three regular lines last night, the old No. 1 of Crutchfield, Duff and McLernon, No. 2 of Elle or McKay, Morse and Crosby; and No. 3 of Lamb, Dickinson and Pidcock. Incidentally, the last named boy's hard work and fine stick-handling earned rounds of applause.

AND so, reader, gentle or otherwise, we bid you farewell as a hockey commentator. Our versatility is such, however, that we expect shortly to return to you in another role. This time ten to one, we'll pick on indoor sports. The Plumbers' Ball, McGill's premier indoor sporting event is scheduled to come off next Tuesday and should provide us with plenty of material. Until then, in the words of our Spanish ancestors, Adios.

## Weekly Index Numbers Of Wholesale Prices

The Dominion Bureau of Statistics index number of wholesale prices on the base 1926-100 moved up from 71.4 for the week ending January 18 to 71.7 for the week ending January 25. Advances occurred in grains, livestock and meats while reductions were reported for raw sugar, eggs and copper.

In comparing the present prices of grains with those of a year ago, it is interesting to note that the index number for this sub-group has risen approximately 25 per cent. Canadian Farm Products advanced from 60.9 to 61.2. Field Products, showing substantial increases for grains and vegetables, changed from 55.2 to 55.6 while Animals rose from 70.5 to 70.6 with better prices for livestock the chief contributing factor.

## SWIMMING NOTICE

Will the following please be at Rice's Studio today at 5:00 P.M. to have their picture taken: A. Bourne, C. Bourne, Elliot, McLean, Percy, Skinner, Freeman, Wayland, Shapiro, Shragovitch, Mills, Pineo, Wilson, Savage. If unable to come, please phone Pineo, FI. 3793.

## CLASS HOCKEY

Today. — Eng. 1-y vs. Law 2.

## INTERFACULTY HOCKEY

Mar. 1, 5-8—Macdonald vs. Arts.

## ROWING

Rowing practices are being held daily from 5 to 6 in the Field-house. A. K. Glassford, president of the Club, and stroke of the 1926 and 1927 intercollegiate championship crews, will be on hand for coaching. All interested are asked to turn out.

## R.V.C. NOTICE

Last Friday 20 girls turned out from RVC to ski together, and weather conditions were excellent. This week, Thursday is the day; more snow has fallen, making this sport even more inviting, especially to beginners. The week-end trippers will leave this Saturday, to return Sunday night. A photograph of the group will be taken in front of RVC just before departure. The train leaves Windsor Station at 1:40 p.m. Skiers are meeting in RVC at 1 o'clock. Names should be in the Physical Education Office by Wednesday at 5 p.m.

## SUSPENSIONS

MacDougall, E. K., Arts 3.  
Morris, H. K., Eng. 4.  
Purtill, J. T. K., Eng. 4.

## PROVINCIAL FENCING CHAMPIONSHIPS

Men's Foil, at the Y.M.H.A., March 14th.  
Epee, at North Branch Y.M.C.A., April 4.  
Sabre, at Central Y.M.C.A., April 28th.  
The Dominion Epee is still to be applied for.

## FACULTY BASKETBALL

Will the faculty basketball representatives please send in their entries for the Interfaculty Basketball League as soon as possible to F. M. Van Wagner, Walter Murray (MA. 3842) or Gordon Holmes (MA. 4300).

## RE-INSTATEMENT

H. K. Morris, Eng. IV.

## DEPARTMENT OF PHYSICAL EDUCATION FOR WOMEN

Substitutions of skating and skiing for indoor classes will be discontinued, starting March 1st. All students are expected to report back to the indoor classes they were previously attending.

# Political Situation

(Continued from page one)

fidence was badly shaken. During the last few months, however, England has again taken the lead in foreign affairs, for she no longer acts through the League. She is gradually returning to her pre-war policy. The Tory party under Churchill has split up, urging a reactionary policy. Lloyd George has made his comeback with his New Deal. He may receive a good deal of support in the House from the "Young Liberals." MacDonald was referred to as a "pathetic figure." He has lost the confidence of the people and the support of both the people and the House. It is highly probable that the Government will rid itself of MacDonald before the elections.

In conclusion, King Gordon stated that Labour was showing a tendency toward socialism. He did not, as one expected, consider A. J. Macdonnell's book, "England, Their England."

## Rowing Club

Practices are being held daily from 5 to 6 under the tutelage of A. K. Glassford, president of the Club and stroke of the 1926 and 1927 championship Intercollegiate crews. All interested are asked to turn out.

## Badminton Club

This evening at the McGill Union the McGill Badminton Club will engage in play. As plans are already underway for a tournament and a match with a local club, a full turn-out is urged.

## Boxing Practices

Boxing practices are continuing on Tuesdays and Thursdays at 5:00 in the Field House. A good many aspirants to B. W. F. honours have been turning out and considerable competition is being provided. Bert Light has issued a call for any others interested to turn out. The Intercollegiate B. W. & F. is to be held at McGill next year and Bert is anxious to carry out the precedent set by Queen's and Toronto in winning the meet at home. He expects to accomplish this by early and intensive training.

## Canadian Lead Production

The production of lead in Canada during November amounted to 31,571,724 pounds, an increase of 8.4 per cent over the previous month's output and 24.5 above November 1933. During the eleven months ending November 31st, 379,963 pounds were produced as compared with 246,521,458 pounds, a year ago. Lead was quoted at an average price of 2,269 cents per pound on the London market, in Canadian funds, in November. Valued at this price the month's output in Canada was worth \$716,362.

# Engineers Defeat Theology In Inter-Faculty Basketball

Orr and Mace Outstanding in 32-9 Victory Yesterday

In an interfaculty basketball game played yesterday afternoon at the Montreal High School gym, the Engineering outfit decisively disposed of the Theology threat in a 32-9 victory. For the winners, Mace and Orr were outstanding, each contributing 10 points.

Line-ups:  
Theology (9) Orr (10)  
Eastman (2) Mace (10)  
Graham (1) Guadagni (2)  
Owens (0) Weinstein (2)  
Mowit (0) Bercuson (0)  
Whitehorn (0) Ethelrod (4)  
Leung (0)  
Nugent (4)  
Partridge (2)

## Dates For Summer School Released By French Department

Professor Rene du Roure  
Director of School  
STARTS JUNE 27

### Previous Knowledge of French Not Essential For Course

THE annual McGill French Summer school will be held at the R.V.C. for five weeks from June 27th to August 1st, according to an announcement made last night. The school will be under the direction of Professor Rene du Roure, Agrege en Lettres, Head of the Department of Romance Languages at McGill.

Students actually live in French for the duration of the school which is residential and co-educational. Only French is spoken. Courses in French are offered for elementary, intermediate and advanced students certificates or College Credits being awarded at the conclusion of the session.

**Optional Program**  
An optional program is organized for leisure hours, the French plays, cinema, newspapers, restaurants, church services of Montreal play their part in the reality of the "living French" experience and the historic background of what was once "New France" lends an added interest.

As a rule all parts of Canada and the States are represented in the Student body and ages run from eighteen to eighty. The cultural level is high and the spirited exchange of ideas forces expression. Circulars may be obtained on application to the Secretary, Residential French Summer School, Montreal, Canada.

According to a statement made by the executive, the School is not designed entirely for those who have a previous knowledge of French. Instead the classes are divided into sections commensurate with the abilities of those in the course.

## NOTICES

### SPANISH CLUB

The banquet of the Spanish Club will be held in the Grill Room of the Union, at 7 p.m., Tuesday, March 5th. The cost is \$7.5 a person. All those who expect to attend must give their names to some member of the executive before Sat., March 2nd.

### GLEE CLUB

The R.V.C. Glee Club meets today in the R.V.C. Common Room at 2 o'clock. It is essential that everybody be on time.

### HISTORICAL CLUB

Members of the McGill Historical Club are reminded that the next meeting will take the form of a joint meeting with the R.V.C. Historical Club, on Tuesday evening, March 5th, at 8:30. The function will be held in the drawing room of R.V.C., and the speaker will be Mr. Douglas Clarke; his subject: "The History of Planoforte Music." Members of the McGill Historical Club are asked to make an effort to attend this meeting, which has been arranged since publication of the printed programme and will, therefore, not be found in the list of meetings for the season.

### MCGILL UNIVERSITY PHYSICAL SOCIETY

The ninth sessional meeting of the Society will be held at 5 P.M. ON FRIDAY, MARCH 1ST, 1934, in the Main Lecture Theatre of the Macdonald Physics Laboratory.

**Speaker:** Professor E. P. Burton, director, McLennan Laboratory.  
**Subject:** Research in Physics at Toronto.

All interested are invited to attend.  
W. BRUCE ROSS,  
Secretary.

### MONTREAL HIGH

The Old Boys of Montreal High are holding a Banquet Get-Together, on Saturday night, March 2nd, at the Queen's. Music and entertainment to be provided. Business: The forming of an "Old Boys' Society." Old Boys of Montreal High please contact the Committee for tickets. The Committee: Rudy Felvus, PL. 9211; Fred Tucker, HA. 2171; Harold Michalis, MA. 7071; Munroe Armitage, HA. 5121.

### WOMEN STUDENTS OF FIRST YEAR

Attention is called to the fact that the Hygiene Examination will be given on Monday, March 11th, at 5:00 p.m., Room 105, R.V.C. Full information concerning this examination is posted in R.V.C. and the Arts Building. Women students of the First Year will please acquaint themselves with the details as given in these notices.

### DEBATERS '37

Class debaters interested in competing in class debates should see Allan Anderson this week, since the first debate is early in March. Leave a note on the board in Bill Gentlemen's office.

### BIOLOGICAL SOCIETY

The next meeting of the Biological Society will be held on Tuesday, March 28th, at 8 p.m., in the Biological Building.

## M. Doig And Schafhausen Present Campaign Planks

### Doig's Platform

(Continued from page one)

interesting at McGill that all those who wish to participate, and rally do not get the opportunity to do so because of the press of numbers, then and then only, I think, should our debating activities be split up into groups.

Finally, coming back to the basis of interest for the student, I would recommend that outstanding thinkers, political and otherwise, be more frequently invited to participate in our parliamentary meetings. This policy, intermittent in the past should do much to increase the students' interest in, and equally as important, the quality of our debates.

Thank you,  
M. A. DOIG, LAW II.

We the undersigned, hereby nominate MELBOURNE A. DOIG for the position of PRESIDENT OF THE DEBATING UNION SOCIETY:

Donald H. Black  
Philip Vineberg  
A. J. Pick  
D. Lorne Gales  
Harvey H. Black  
Herbert H. Tees  
Arthur J. Marshall  
Robert Quinn  
Louis J. Ruschlin  
George S. Challies  
Lindsay H. Place  
Fabre Survever  
Brendan O'Connor  
John P. Rowat  
J. A. Hutchins  
T. H. Carlisle

### Schafhausen's Platform

(Continued from page one)

that, is to act as a forum for the discussion of ideas whereby the public may gain some glimpse of undergraduate thought. It is an intellectual bond between student body and public; in this spirit it has been successfully carried on in the past, and as long as there are good speakers at McGill will continue as such. But this business of furnishing the public with an evening's good oratory is not enough. Nor is it enough that most of the speakers are drawn from one or two faculties, due mainly to the fact that most of the subjects chosen for debate are of little interest to that vast, scientifically-minded portion of the student body which is full of potential speakers but has been never properly approached.

Large public debates are not indicative that the Debating Union is exerting its full force for good among the students. This will only be achieved when the subjects for debate are designed to interest one group or the other, and these groups, whose approach to any given subject is bound by their very nature to differ is bound therein a real incentive or excuse (if you will call it that) toward becoming more and more proficient in the art of public speaking.

The acquiring of this art is the raison d'être of any debating society, and no one should consider contesting an election unless he is clear in his own mind that he must work, firstly towards extending the scope of the Debating Union within the University, making it clear a means of practical assistance to everyone whatever their personal interests may be, and secondly, towards maintaining the standard of public debates on a high plane it has always enjoyed in the eyes of students and public.

H. M. SHAFHAUSEN,  
LAW I.

We the undersigned, members of the Students' Society, do hereby nominate HENRY M. SHAFHAUSEN, LAW I, for the position of PRESIDENT of the MCGILL DEBATING UNION SOCIETY:

Allison A. M. Walsh  
Harry H. Hemens  
Edward F. Lennon  
E. A. M. Edson  
A. M. Minnion  
John A. Hutchins  
Ronald Place  
D. T. Amaron  
D. Lloyd Davies  
H. W. Peck  
L. Robert  
W. Derry  
G. Bailey  
R. L. McGibbon  
Bob Anderson

## College Ethics

College should develop in the individual a sense of responsibility. If a college student is incapable of responding to responsibility, he should not be in college. Moral and ethical weaklings should not be hampered by any college rulings. Ultimately, only the fittest will survive in the scheme of life; education may prolong survival, but it cannot affect it.

Classes should be offered for only those who are sufficiently intelligent to recognize their value. Upper classmen, after their orientation, should not need incentive other than their own intellectual curiosity to make them attend classes. Punishment in one form or another for "cutting" classes is inconsistent with this policy.

Students should shoulder their own burden. If they have no desire to learn, education cannot be thrust down the recesses of their minds by compulsory attendance rules. In life they will find no "cut" rules to help them. If college purports to fit students for the world, it should foster independent individual education.

"Cut" rules are not fair to the individual; they favor the mediocre. To work or to loaf, it is a problem of the individual. As individuals, students should be allowed to solve their own "cut" problems. In the end, it is a wiser game. — Boston University News.

### The Library Of The Bureau

The Carnegie Endowment for International Peace has recently agreed to make the Library of the Dominion Bureau of Statistics a depository for publications issued by its Division of Economics and History. This past week 68 volumes have arrived, 12 in German from Vienna, 2 in French, and the remainder in English from the Oxford and Yale University Presses.

These include such writers as: G. D. H. Cole, J. A. Salter, Sir Josiah Stamp, with many others, and some of the titles that sound attractive are: The End of the Russian Empire, Russian Schools and Universities in the World War, The Effect of the World War Upon the Commerce and Industry of Japan, and Rural Scotland during the War.

These books are to be housed in a special section of the library and are to be made available to anyone wishing to use them.

## Scientific Discoveries

It has been the custom in recent years to look upon great scientific innovations as having burst upon the world within a few months, or at most within one or two years. Such an outlook, the result of existence in an age in which the rate of scientific discovery is greatly accelerated, diverges considerably from the actual case.

Rome was not built in a day, nor has any great invention been conceived, since the first functioning of human brain, that has taken effect upon civilization in a short period of time. Take for example the discovery of electricity. Although practice, was in advance of theory in the age in which it was discovered, electricity was not put to economical use until almost a century afterward.

Furthermore, there is the fact that as more and more minor scientific discoveries are made and put, during the course of time, to practical advantage, the more complete becomes our knowledge of the universe and hence the smaller becomes the importance of any one new discovery in relation to civilization. Should the experimental analysis of the atom be accomplished in the near future, its new value would be great, but it is doubtful if its practical possibilities would be realized for many years thereafter. Great as these practical possibilities might seem when featured upon the Sunday page of a second-rate newspaper, they would be much less inspiring when viewed from the angle which stresses their more probable, economical and, social use, and the time necessary in order to adapt them to this use.

Several years ago a very imaginative account was made in a mediocre New York newspaper, following a certain scientific discovery, upon a death ray which would melt a magnet at a distance of five miles. Later there had been found a death ray which would disintegrate blood through the action of high-frequency oscillations.

The scientific creations from which resulted these rumors and articles were never put to practical application: the reason is that civilization at the time of their discovery was not sufficiently far advanced to utilize them. This fact is true of almost every important invention.

To furnish proof of this statement in a negative manner, we may take the discovery of the balance of power by Cardinal Wolsey, Diplomacy, whose problems do not yield readily to the scientific method, was in great need of innovations, and hence was quick to adopt it. It appears then, that only in the natural sciences is the world so far developed that the introduction of discoveries must wait for utilization until civilization catches up with them. — The Tech.

## British Trade Statistics For 1934

Trade statistics for the United Kingdom which have just become available show that in the calendar year 1934 total British imports were £72,300,000, as compared with £67,500,000 in 1933. Of this total, imports from British countries amounted to £27,500,000 in 1934, as compared with £24,900,000 in 1933, so that they were 37.1 per cent of the total in 1934, as compared with 36.9 per cent in 1933.

Exports of the produce and manufactures of the United Kingdom in 1934 were £366,100,000, as compared with £367,900,000 in 1933, an increase of £28,200,000. Exports to British countries were £186,600,000 in 1934, as compared with £163,500,000 in 1933, thus contributing £22,100,000 to the total increase of £28,200,000. Thus the share of British domestic exports taken by Empire countries increased from 44.4 per cent in 1933 to 46.9 per cent in 1934.

While detailed statistics of British exports to Empire countries are not as yet available, it may be noted that British exports of iron and steel to Canada rose from 113,006 tons in 1932 to 132,500 tons in 1933 and 147,600 tons in 1934. Also exports of cotton piece goods to Canada, which had stood at 27,000,000 square yards in 1932, rose to 47,000,000 square yards in 1933 and to 64,000,000 square yards in 1934. Similarly, exports of woollen and worsted tissues to Canada rose from 6,900,000 square yards in 1932 to 9,700,000 square yards in 1933 and to 13,100,000 in 1934. Thus in respect of three chief lines of British exports, Canada's purchases in 1934 have been very considerably larger than in either 1932 or 1933. More detailed figures of Canadian trade with the United Kingdom in 1934, as seen from the British point of view, will be available later.

## Silver Production During November

Silver production in Canada during November advanced to 1,535,079 ounces from the October total of 1,513,617 and the November, 1933, output of 1,293,095. Production during the eleven months ending November totalled 14,855,374 ounces or an increase of 5.4 per cent over the output in the corresponding period of 1933. Silver quotations on the New York market, in Canadian funds, averaged 52.956 cents per ounce in November at which price the Canadian output during the month was worth \$812,214.

## Empire And Foreign Corn In Canada

Stocks of Empire and foreign corn in Canada on Jan. 25 were as follows, with 1934 figures in brackets: United States 5,702,000 (9,108,000) bushels, Argentine 186,000 (1,594,000), South African 2,570,000 (130,000). United States corn was located mainly at Depot Harbor, Collingwood and Owen Sound, which each had over one million bushels, Goderich, Midland, Port Colborne and Toronto, while South African corn was mainly at Halifax, Montreal, Quebec, St. John, Toronto and Port Colborne.

## Wood Pulp, Pulpwood And Screenings

The December export of wood pulp and screenings amounted to 1,116,150 cwt., valued at \$2,184,043, as compared with 1,047,701 cwt., at \$1,994,889, in December, 1933. The largest purchaser was the United States, at \$933,122 cwt., followed by the United Kingdom, at 73,663 cwt., and Japan 54,546.

Pulpwood exports showed an increase over December 1933, being reported at 53,053 cords, valued at \$350,206, compared with 40,035, at \$234,251. The United States took 52,177 cords.

## Student Constructs Portable Domicile

Bloomington, Ind.—Own your own home" is the motto of Robert Webb, '38, who has towed his own house on wheels all the way from Cicero, Ind., to its present location—a vacant lot in the 300 block on South Dunn street. He plans to remain there for the entire school year.

Webb's "portable domicile," built entirely by himself, is made of wood, is 18 feet long, eight feet high and is mounted on the chassis of an old-model touring car.

"I came up here early last summer to locate a lot for my house," Webb said when questioned concerning his plans. "I believe this method of living will be of considerable saving to me throughout the year."

The house is complete with cot, table, rocking chair, kerosene lamp, mail box and house number. And as for water supply—25 gallons obtained from a next-door neighbor does for a month at a total cost of four cents. Webb is well satisfied with his present dwelling, which lacks only a foundation, front door steps and a chimney.

## Milling Of Grain In December

Grains ground in Canadian mills in December were as follows, with Dec. 1933 figures in brackets: Wheat 4,360,862 (4,327,624) bushels; oats 715,529 (631,497); corn 111,141 (124,216); barley 62,243 (59,925); buckwheat 24,258 (21,886); and mixed grains 1,636,179 (1,501,845). Flour production in December amounted to 969,482 barrels, compared with 967,244. Exports amounted to 340,751 barrels, compared with 418,163.

Previously considered as a perfect vacuum, space is now thought to contain about one atom per cubic inch. These roving atoms are believed to be an aid to astronomers in measuring the distances to the various stars.

## Fur Industry Of Canada

The total value of all products of the fur goods industry in 1933 was \$11,552,000, compared with \$10,792,000 in 1932 and \$14,247,000 in 1931. It was the first year since 1928 that there has been an up-turn in value, the increased demand for furs being the result of the unusually cold weather prevailing during the winter of 1933-34, as well as of the lower prices which brought fur goods within reach of a larger number of people. The number of fur coats made for men increased from 1,132 in 1932 to 2,359 in 1933, and the number made in sizes for women from 55,306 to 65,421. The average price for men's fur coats in 1933 was \$51, compared with \$69 in 1932 and 67 in 1931, and the average for women's fur coats, \$98, in comparison with \$104 in 1932 and \$124 in 1933. Fur muffs have again become fashionable, the number increasing from 2,510 in 1931 to 6,036 in 1932 and to 14,876 in 1933. Other items of importance are cuffs, collars and scarves of fur, and fur trimming. The amount received for custom work, repairs and storage of furs was \$2,209,000, compared with \$2,296,000 in 1932 and \$2,446,000 in 1931.

The number of establishments making fur goods as their principal product in 1933 was 332, distributed by provinces as follows: Ontario 155, Quebec 125, Manitoba 27, Alberta 7, British Columbia 4, Saskatchewan 2, and Nova Scotia and New Brunswick one each. The total number shows an increase over 1932 of 53, many of the establishments added to the list being of small size with output consisting chiefly of repair work.

Canada exports annually large quantities of raw furs, but her export trade in dressed furs and manufactures of furs is of comparatively little importance. The total value of Canadian furs exported during the calendar year 1933 was \$12,141,000, divided as follows: fur skins undressed \$11,925,000, fur skins dressed \$172,000, and manufactures of furs \$44,000. Compared with the preceding year, the total value shows an increase of \$1,185,000, or 11 per cent. The United Kingdom and the United States provide the chief markets for Canadian furs, the former in 1933 taking 62 per cent of the total exports, measured according to value, and the latter 27 per cent.

## Index Numbers Of 23 Mining Stocks

The weighted index number of twenty-three mining stocks computed by the Dominion Bureau of Statistics on the base of 1926 equals 100, was 124.3 for the week ending January 24, as compared with 122.9 for the previous week. Nineteen gold stocks rose from 121.9 to 123.0 and four base metal stocks from 130.4 to 133.0.

## National Research Council Scholarships to be awarded in 1935

BURSARIES of the value of \$450 will be open to award to applicants who have graduated with high distinction in scientific study.

STUDENTSHIPS of the value of \$500 will be open to award to applicants who have already done some original graduate research in science.

FELLOWSHIPS of the value of \$550 will be open to award to applicants who have given distinct evidence of capacity to conduct independent research in science.

ATTENTION is called to the fact that owing to drastic reduction in the appropriation available this year for scholarships, only a limited number of awards can be granted. Consequently, applications should be strictly confined to candidates with outstanding records, both in their undergraduate and postgraduate courses.

MARCH FIRST is the final date on which application may be made.

APPLICATION BLANKS and copies of the regulations governing these awards may be obtained from the Registrar of your University. Mail applications direct to "The Secretary, National Research Council, Ottawa."

S. P. EAGLESON,  
Secretary-Treasurer.
